PAGINATION USING STORED PROCEDURE

```
CREATE DEFINER=`root`@`localhost` PROCEDURE `output`(IN n1 int, In n2 INT)
BEGIN
DECLARE a int;
SET a=n1-1;
SET a=a*n2;
SELECT * from Employee limit a,n2;
END
```

For a schema with 10 records, we fetch 5th page and each page has 2 records.

```
11        call output(5,2)
```
